

Unrest, Chaos and Blackout as Potential Club Scenario

updated at

April 30, 2023

Abstract

This document is a viewer made production, which accompanies the interview with Alexander Laurent. It therefore doesn't guarantee to be flawless or in perfect accordance to the meant content to its original.

Transcript

Dear viewers, dear fellow human beings,

we are facing very difficult times, the most difficult during our lifetimes. The whole humanity will be submitted to hard challenges. If you have listened attentively to the interviews with Alexander Laurent and haven't rejected the information contained therein, neither out of fear nor out of ignorance, and you did not allow the content to be picked to pieces or transfigured esoterically by third parties, you have an inkling of what is to come. Further you have been able to prepare for the staged catastrophes to be introduced variably by the digital nobility and the club. In order for the ongoing measures of destruction of the hidden powers of this world to take effect during the coming period, it is planned to use supplementary measures against some or all parts of the world's population, in order to achieve more efficiently and guaranteed the goal of a drastic population reduction in the long term.

A reduced and weakened world population will make it possible for the hidden powers in the coming decades to introduce extensive world-wide surveillance and control, by which an unification of humanity will be achieved, which, in a more distant future, will make it very easy for us to be forced into a biological-digital existence. In other words, a population reduction that in the long term will serve to implement an irreversible biological digitalisation of humanity. Among the supplementary means of the powerful, which are to considerably reduce our chances of survival in the years to come, include, above all, the following potential scenario: As you may have already been aware, a frequency fluctuation occurred in the late noon hours of 08. January 2021 in the European electricity interconnected grid that had the power to put all of Europe into a power blackout lasting several weeks (Fig. 1). Partly as a result of that so-called "incident", Mr. Laurent must urgently points out that there is now an increased likelihood that club and digital aristocracy, for strategic reasons will implement a blanket blackout for the whole of Europe or the USA in the near future. A decision by the Club that will bring about protracted, drastic changes in the economic and inevitably also in people's social lives. Such a blackout, which could possibly last for several weeks, would not be the final blow to the European or US economy alone, irreparably damaging it for years to come. But would in any case lead to the absolute collapse of the global economic and financial world.

A widespread European blackout, combined with the pandemic-related business closures and nightly or all-night curfews would create a situation in which a smooth expropriation of any assets in banks, savings banks and insurance companies can take place. Through power cuts, curfews and the general closures of business, chaotic and possibly aggressive bank runs are suppressed. Citizens unsettled by the blackout will sit locked up at home for days, hoping that the blackout will end, while in the same period of time they are being disappropriated quietly and unknowingly, without outcry or resistance. Even if locked-in citizens suspect or learn that the power blackout will cause a complete economic collapse, resulting in the expropriation of all private assets in banks, it will not be possible to access assets in banks, checking accounts, saving books, as well as safe deposit boxes, life policies or contracts. Even via mobile phone networks, which may well continue to run on emergency power for several hours to days, you cannot withdraw funds from banks online, because the online portals,

although their servers are kept running with emergency power generators, strangely enough will not grant access to your bank account. Anything the powerful want to collect from the citizens, they can do so swiftly, without resistance or widespread uproar. Fittingly, the reasons for the decided legal expropriation can be blamed on the power blackout, which in a kind of chain reaction, causes a globally triggered economic collapse. Force majeure, in other words, for which no one could be held responsible. The defrauded people are then sold the obvious robbery as an unfortunate chain of failures in the energy sector, for which they should not blame politicians, bankers, elites or powerful people, but only in fateful events that cannot be influenced. The economic collapse that has already occurred as a result of the pandemic measures will be perfectly diverted and dispersed with this – by putting the blame for the economic and financial disaster on the blackout alone, while the pandemic regulations can continue to run expediently, thereby keeping dispossessed people ready to revolt can be kept under control continuously. Without panicking, every person, family or group that wants to prepare for the contrived blackout and the developments that will follow, should stock up on food and sufficient water for at least a few weeks. Care should be taken to have cooking facilities, sources of heat, electricity and light. Defense and defensive measures may be important. In this regard, however, each person and each group must consider for themselves how to prepare themselves physically and psychologically for such an emergency. On the internet you will find many useful tips, inspiring literature as well as informative YouTube videos. Take a look at our crisis preparedness channel on Telegram. As a viewer, you may now be wondering why Mr. Laurent is just now highlighting the likelihood of an imminent blackout in Europe or the US. Tactics towards our opponents play a very important role here, because if Mr. Laurent had mentioned what exactly to come months or years beforehand, the club could have adopted a completely different strategy. Mr. Laurent, as alerter, would thus have had to constantly send

Figure 2: Inset picture in the original video.

adjustments and changes behind him to people and the prevention of catastrophic events would have remained ineffective. For this reason, Mr. Laurent only mentions the increased probability of a complete power blackout only now, in order to make this late public announcement or awareness to provoke an abortion of the intervention firmly planned by the club and the aristocracy in order to minimize all substituting strategies and improvisations of these powers as small as possible and/or make them difficult. Bear in mind that because of the planning game to be adapted by the nobility and the club, the methods of destruction against us humans can always be conveniently altered, varied, combined, supplemented or completely suspended. Because of the circumstances in front of which the blackout to be staged may take place, you should make sure in good time to stock up on sufficient cash reserves, as well as have means of exchange, such as cigarettes, lighters, soap or seldom used but still useful and indispensable everyday items and foodstuffs. Due to the general creeping decline in the value of FIAT currencies, physical gold and silver will become indispensable. Physical gold and silver will become indispensable, especially silver, with its lower value compared to gold, will be very useful for trading goods and items.

In such a crisis, you may not be able to pay with silver in an ordinary supermarket, but farmers, farm shop owners and other self-employed businesses will gratefully accept such real money. Don't forget, if you still want to buy gold or silver now, to always buy anonymously from metal dealers, as the state may come to you later to "inquire" about your gold and silver. Through a law quietly passed by the German parliament¹ in 2015, banks can in the event of an economic and financial crash not only legally withdraw balances up to 100,000 euros from citizens' accounts, but also much smaller balances, even overdraft facilities, should that become necessary.

You should therefore consider whether it would be possible to reduce the volume of your over-

¹In German: *Bundestag*

draft credit or perhaps even to cancel it altogether. Even overdraft facilities that are not used can be debited by the bank to your disadvantage. Those who do not immediately need to have a full bank account to process their standing orders and debits should withdraw funds and only leave as much in the account as is absolutely necessary. We give consideration to the fact that even small debts that are in an account, after a crisis, such as a conversion to a new currency, will usually be converted into a much higher debt burden – as has happened with all previous currency reforms, that came out of a collapse. This means that an exhausted overdraft facility or an overdraft facility seized to bail out banks in the amount of 2000 euros after a currency reform can easily be equivalent to an amount of 20,000 euros in today's purchasing power, which one would have to pay off after the bank bailout. Credit balances, on the other hand, are converted much lower. So even with a large credit balance you would not necessarily be able to comfortably pay off your debts afterwards. Bear in mind that even if politicians and so-called elites, because of escalation and to control the situation, chaos is bound to break out in cities and towns. And it will break out, sooner or later, at the latest when, due to the credit crunch, supply chains of suppliers, producers and companies begin to collapse. Therefore, do not forget that during this civil war-like unrest, you should not simply attack the apparently responsible persons, but that it will be important to identify who is orchestrating this unrest, to identify who is really causing this orchestrated chaos and for what purpose. It will be important to address the real reasons for the catastrophes and to explain what all this is for in the long run. Talk about the interviews, spread the videos, explain to other people, what our planet is really about. This will do more than what some citizens will do with the seemingly powerful, the politicians, elites, officials, the well-to-do and secret supporters of this system. Persecuting, lynching, murdering and torturing will not change anything, which is exactly what the real rulers of this world want. In the long run, they feed themselves and their power from it. So,

Figure 3: Inset picture in the original video.

if out of the result of chaos and violence new measures and new stricter powers are put into place, who even through the police, army and tyranny, the state's repressive and extortionist power and

blackmail machinery, you, as citizens, must resist and say "no". And say "no" by implementing work boycotts, blockades and disobedience. By doing this you will achieve something, you will bring these forces down. You only have to confront the bent powers, their compliant earthly lackeys and helpers with this attitude. You don't need indignation, anger or even violence to do this – just by depriving them of their work you will put them in chains and reveal all their backers. And everyone will be amazed at the monstrous fraud system that has been uncovered. Unfortunately, the social media-only awareness of the plans of the club and the digital aristocracy is no guarantee that awareness alone will have such a far-reaching effect that the club and the nobility would have to consider a completely tactics and procedures. They may just adjust the method of the blackout, for example, let the pandemic abate or end it completely and then have the blackout happen later, so that they can use this method to provoke riots, lynch mobs and civil war like conditions, for which a regulating power of order and new control can be introduced – a tactic adapted by the club and the aristocracy, in other words, a tactics by which, in the long run, renewed legitimate influence and drastic measures could be exercised and enacted. Mr Laurent's mention that the club and nobility are planning a staged blackout can the implementation of this plan altogether, or at least postpone it improvisationally for months or years; however, the club's possibilities and variations always remain open and are manifold, which seems to make the fight against them so hopeless. Nevertheless, the power of the club and digital nobility stands and falls above all with the far-reaching awareness of their plans and motives, and the exposure of their global influence and actions. Only the widespread publication of the imminent plans of the powerful can change things constructively. And of course, as I said before, if you want to change things, do not forget in the worst of times, withdraw what these powers all need – your labour!

Start blackmailing these powers! Everywhere, everyone. Be tough and consistent, organize yourself without such alternative media, who only stall. Don't follow appointed fake revolutionaries or promised saviours. Do not rely on petitions and protests that go unheeded and ineffective. In order to make a lasting difference in the club's still to be implemented process variants, you must above all resolutely withdraw your labour. Piece by piece and faster than expected, the pyramid stones are being removed one by one, from the bottom to the top. You will see, this is how you really achieve something. This is how you will control these powers and you will be able to watch their influence crumble to dust. In order for real change to develop through people's awareness, it is important that you dear viewers, share the information on our channel as well as our interviews widely in the social networks and media. Every sharing, liking and subscribing to our channels, videos and content will not only help you to be timely informed about the covert actions of the ruling club and digital aristocracy in the times to come, but more importantly, you are actively helping to ensure that many people actually wake up and recognize hidden powers and influences. To realize elitist and manipulative forces; to be able to distinguish between stalling and alternative media; to realize real enlightenment, realization of freedom and influence. For up-to-date info, videos, answers to interview questions, and ideas and tips for crisis preparedness can be found on our channels. To do so, click on the links in the video description of this post. Thank you for watching and see you in the next video.

Best wishes from Alexander Laurent and Eurasia Couple.
